

To review a report on the Library Hub furniture and consider any actions and associated expenditure

During the latter Covid lockdown period we were able to replace a lot of the old dangerous metal shelving and chairs with new updated wooden shelving and modern seats.

We still have dangerous and old metal shelving attached to the extension walling in our children's section which is now becoming dangerous with sharp edges.

The proposition is to replace this with new updated modern wooden shelving system designed and purpose built for use in a children's area with a front facing shelving which helps and encourages children to pick out books and a good amount of shelving space for books.

We will also keep the two wooden front facing book displays we have which will sit either side of this unit.

Through Furniture at Work this Nucleus Book Display shelving system would cost £1,227.00 ex VAT.

It is recommended to use Library EMF Expenditure – 6972 Library Equipment & Furniture with a current balance of £8,554.
