

To receive the results of the trial Impact Assessment on Town Council projects and consider any actions

Climate Change Strategy Impact Assessment Reporting

Town Council Officers have trialled the Impact Assessment for Town Council projects using the form included in the reports pack.

The results are then fed into the decision wheel to produce the visual image that demonstrates the impact of the project on the areas identified in the Climate Change Strategy.

The impact of the project on the Town Council Business Plan Deliverables has also been included in the decision wheel as the inner ring, providing information to assist when monitoring the deliverables.
