

It has been a while now since the refurbishment of the toilet facilities at the Football Club was completed , including the new entrance of which the widening of the door was a very important part of the scheme.

Because we have the disabled facilities and baby changing there is no reason at all why anyone should not use the football club and it's fantastic facilities.

We have had nothing but praise for the project and have noticed that the footfall has increased dramatically and we are fully booked until the beginning of next year.

We have had numerous people in wheelchairs with carers coming to watch a football match for the first time.

We had one gentlemen from St Ann's who turns up now and then to watch a game which makes such a difference to us to be able to welcome him and be able to use all the Club has to offer, either on a match day or just a social occasion.

The bar has been refurbished at zero cost through the efforts of our social committee getting sponsorship from local businesses as well as using recycled materials. Also the lighting in the club and stand has been upgraded to led which improves our carbon footprint kindly sponsored by Howton Solar Farm and Denmans Electrical. If any Councillors wish to pop in and see our efforts they will be most welcome, if on a match day make yourself known to Dave in the pay booth and he will get one of us to show you around.

Thank you once again for the sponsorship of our entrance door

Kind Regards and best wishes from all of us at Saltash United AFC
