

Saltash Town Council Voluntary Tree Wardens' Report

PA25/02454 - Square cottage Forder Saltash PL12 4QR

We recommend agreement with the application.

We have to say that we were unable to walk across the whole site, but we looked at the trees from the adjacent public footpath and from within the property near the front door when we called at the house. We could see all of the conifers within the application and the tops of most of the failing ashes. The site hosts a considerable number of trees of varying ages and heights, most of which look in very good condition from our vantage points.

We have also studied the photographs kindly supplied by the tree surgeon. We have to commend the report which we considered to be substantial and fair. There is a report on every tree in question accompanied by photographs , except for the Hazel at the entrance.

Accordingly, we agree with the work recommended within the application on the basis of our observations as stated above.
