Definitions

- 1. Dusting to hand height, includes the manual dusting of all furniture, fixtures and fittings from floor level up to the normal reach of a cleaner standing up, but not being required to stand on a ladder or chair, etc. It includes the removal of dust from desktops and other horizontal surfaces, provided these are kept as free from papers and other obstructions as possible.
- 2. Dust control method includes the use of a dry mop or mitten, which has been impregnated to give it the ability to absorb dust; also the use of a sweeping compound on floors to absorb dust.
- 3. High dusting includes the removal of dust by manual means from all horizontal dust catching surfaces above normal hand height, including light fittings, high rails, pipes, tops of high cabinets, tops of doors, pictures and bookcases.
- 4. Sweeping includes the removal of surface dirt from floors (and in certain circumstances, carpets) by means of a hand broom, with or without dust-laying compound, by impregnated mops, or mechanical brush / vacuum machine.
- 5. Floor buffing usually carried out with electrical or orbital action machines fitted with either a polishing brush or a back plate with nylon or steel wool pads, to remove marks and improve the shine.
- 6. Floor polishing includes the application of a suitable polish to a floor and buffing if necessary, e.g.
 - (a) Wood floors with a natural wax polish followed by buffing.
 - (b) P.V.C. floors with a synthetic wax emulsion followed by buffing, or with a "dry bright" plastic emulsion wax-free polish not buffed. Polish is applied either with a spray gun under pressure, or by mop.
- 7. Damp mopping includes the removal of surface dirt and spillage using a mop and the minimum of liquid detergent and water solution.
- 8. Washing includes the removal of surface dirt and spillage from floors using a hand mop, or floor cloth, or other approved non-mechanical means to apply a suitable detergent diluted with water. The resultant sludge is removed with a mop and the surface neutralised and left clean.
- 9. Scrubbing includes the removal of in-trodden dirt, scuff marks and polish, by rotary brush machine fitted with a hard-bristle brush, with or without a wire wool pad. The operation is done either dry or wet, using a suitable detergent, depending on conditions. If dry, the resultant dust is removed by sweeping with an impregnated mop. If wet, the sludge is rinsed off with a mop and the surface neutralised and left clean.
- 10. Disinfecting telephones the wiping of telephone handsets with a soft cloth impregnated with a solution of approved disinfectant.
- 11. Spray cleaning spraying a mixture of emulsion polish and water on the floor and buffing dry with a rotary brush machine to remove marks and polish the surface. By this method, the polished surface is maintained and the floor cleaned at the same time. The dirt removed is brought to the surface in the form of a fine dust which is removed by a dust control mop.
- 12. Scouring includes cleaning of glazed sanitary ware using non-abrasive bleaching powder applied with a cloth or a specially designed liquid cleaner applied with a spray gun.
