

To receive an update on the Community Levelling UP Project and consider any actions and associated expenditure

Studio Hive and the team continue to work on the Feasibility Report whilst reviewing the transport trial options. The idea behind the transport trial is to see how the Waterside and the Town can be connected together with our neighboring City Plymouth, by the use of various transport modes.

The anticipated date for the transport trial is Saturday 30th March 2024.

Studio Hive are assessing transport options off the back of the community engagement workshops and liaising with Members of the Working Group. Part of the Grant covers the transport trial to take place.

The next meeting is to be held on Thursday 11th January 2024 – further update to be received.

If you would like to have a look at the options being considered, the project website is live at <https://www.saltash.gov.uk/consultations.php>
